DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to an aquarium water changing and stabilization system, classified in class 119, subclass 248.
- II. Claim 2, drawn to a cabinet, classified in class 312, subclass 329.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a housing for a small animal or a storage compartment for books or documents. In essence, the cabinet can function as an enclosure for articles other than aquarium tanks. The aquarium of invention I, in turn, could be enclosed and supported by structure other than the specific cabinet of invention II—for example, by a cage or other reticulate housing. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3643

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
